Dear ladies and gentlemen,

On behalf of the Association of Metallurgy of Uzbekistan, it is my great pleasure to welcome the distinguished guests and participants of the 7th International Mining and Metallurgical Forum of Uzbekistan – UIMF 2025 and the 19th International Exhibition of Mining, Metallurgy and Metalworking – Mining Metals Uzbekistan 2025.

Both metallurgy and metalworking are among the key pillars of the economy providing a strong foundation for industrial production, starting from sheet metal up to components for the most complex machinery and mechanisms. In Uzbekistan, both ferrous and non-ferrous metallurgy continue to develop successfully, meeting the needs of diverse industries for raw materials. Alongside the growth in output, significant structural transformations are under way, aimed at strengthening resource efficiency, modernising production capacities, and fostering a favourable investment climate.

Mining Metals Uzbekistan 2025 will showcase the latest developments applied across various sectors of metallurgy and metalworking offering visitors the first-hand access to many advanced technologies. Meanwhile, the UIMF 2025 Forum will present an extensive programme addressing a wide range of topics — from regional cooperation, investment promotion, and industry resilience to resource conservation, development of critical minerals, clean transition, and digitalisation.

Together, the exhibition and Forum create a powerful synergy by combining the practical demonstration of equipment and technologies with the innovative and R&D insights of the Forum.

I am confident that your participation in these events will contribute to your business growth and advancement of production technologies.

I wish all participants productive work and great success at the exhibition and Forum!

Regards,

Chairwoman of the Association

G.B. Tojimirzaeva
