

TransLogistica

UZBEKISTAN

22nd International Exhibition

TRANSPORT AND LOGISTICS

10 > 11 > 12 NOVEMBER

2026 TASHKENT

Uzbekistan occupies a strategic position at the heart of Eurasia, at the crossroads of major transport routes linking East and West, North and South.

This geographical advantage makes the country a natural transport and logistics hub shaping international and regional freight flows across Central Asia.

The Transport and Logistics exhibition takes place in Uzbekistan as a key professional platform for showcasing transport infrastructure, advanced logistics solutions and promising international transport corridors in the region.

For 22 years, the exhibition has remained to be the central B2B platform for the transport and logistics industry in the country by bringing together the market professionals, government regulators, transport operators, infrastructure companies, and technology providers. The event's long-standing history confirms its status as a leading industry platform for business dialogue, establishment of partnerships and development of international cooperation.
