UZBEKISTAN

16 | 17 | 18 MARCH 2022

TASHKENT, UZBEKISTAN

17th International
Exhibition

**AgroWorld
Uzbekistan 2022**

**MEAT AND
POULTRY
PAVILION**

Key sections:

| Animal breeding

| Animal Health

| Animal housing
& farm equipment

| Slaughtering and primary
processing equipment

TECHNOLOGIES EXHIBITED

Agricultural premises

Feed

Animal housing & farm equipment

Slaughtering and primary processing equipment

Meat processing equipment and technologies

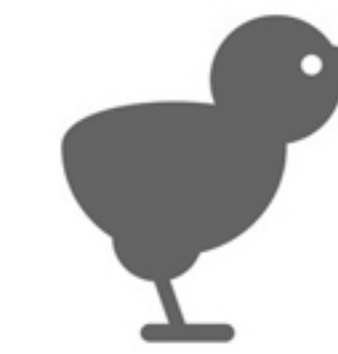

Refrigerating and freezing equipment

Specialized transport and logistics

Packaging technologies and equipment, labeling

Animal breeding

Animal Health

Feed ingredients and additives

Raw materials for the production of meat products and semi-finished products

Automation services

Dairy farms

Milking equipment

Smart agriculture

Subsidies for egg production in 2021 will increase by 3 times, for the preparation of poultry meat-by 2 times

To gain 1 kilogram of weight, poultry needs 1.7 kilograms of feed, and cattle needs 8 kilograms of feed.

However, our country produces few poultry meat and eggs per capita

In this regard, the size of subsidies for the production of eggs will be tripled, for the procurement of poultry meat will be doubled.

The producers of feed and poultry products will be reimbursed part of the loans received to replenish working capital and implement poultry projects in sum that exceeds the base rate of the Central Bank.

Part of the costs of projects for the establishment of modern complexes for cutting poultry will be compensated. The tax rates on profits, property, land and water for poultry enterprises will be reduced by 50%.

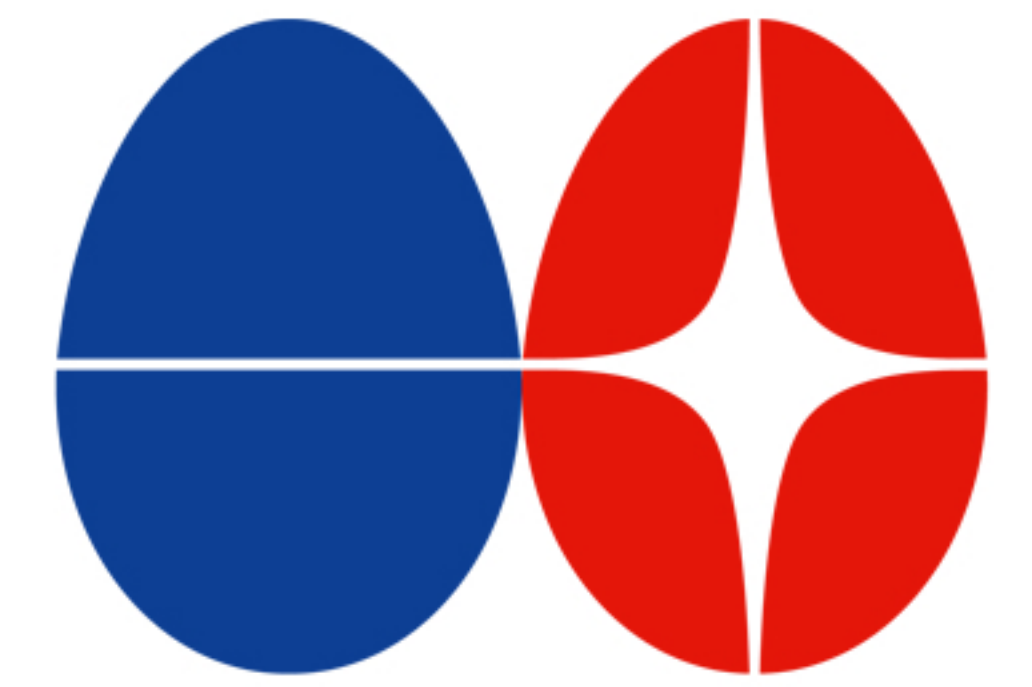

The state will allocate \$50 million through «Mikrokreditbank» for the implementation of relevant projects.

The measures on increasing the meat production by launching more than a thousand projects in the livestock sector and 317 projects in the fish farming have been considered
